

Implementation

Implementation of a planned facility can be the most challenging aspect of a project. Easements, permits, and construction issues require an experienced team.

Alta Planning + Design offers a full suite of services, from planning and design to full construction documents and construction administration. Our staff includes nine registered Landscape Architects across the country with over 100 combined years of experience negotiating easements, securing required permits, and working with contractors to quickly resolve on-site issues during construction.

The Stafford Basin Trail included construction of a 250-foot boardwalk across a wetland, turning a perceived obstacle into the highlight of the trail. The boardwalk has a steel frame with recycled plastic decking that will require less maintenance than a traditional wooden boardwalk, but maintains the look and feel of wood.

The first phase of work for Kaiser Woods Park included extensive earthwork to create usable spaces on a hillside site, connected by an ADA-accessible trail.

The successful test of a 24-zone irrigation system at Kaiser Woods Park, Beaverton, Oregon. The park program included planting, irrigation, trail design, and site furnishings.

Principal George Hudson joins the contractor, client, and City Engineer on a weekly site inspection of the Stafford Basin Pathway in Lake Oswego, Oregon. Regular site visits during construction will keep a project on schedule and allow early identification and quick resolution of issues.
