

Construction notes

- Final design to be determined by a qualified builder based upon such factors. Including, but not limited to: site conditions, local use patterns, flow, weather, surfacing, fall zones, and speed.
- Dimensions are approximate and should serve as guidelines. Actual dimensions are to be determined by a qualified builder to best accomplish the goals and objectives of the design.
- Grade to drain water away from use area.
- Areas not to be used for development should be landscaped in a manner that does not pose a hazard to users of the site.
- Water source should be provided for construction and maintenance needs.
